Your written comments are an important part of your course and instructor evaluation. Please provide feedback in the box below on aspects of the course and/or the instructor that were most effective or need improvement. Student comments will be provided to your instructor only after course grades have been submitted. The instructor may, but is not obligated to, share these comments with others or include them in any evaluation process.

- Easily one of the most pleasant and apt professors I have ever had. He was always willing to hear any students' comments or concerns regarding the course and would take them into consideration. He was extremely organized and structured the class well. This was the best experience I've had with an online course.

- Great teacher! really helped us understand the material

- I believe having the tickets to class and all of the different discussion posts were very helpful for retaining the information that was provided during the classes. There were not too hard to complete and it helped that they all counted as credit towards our grade regardless if our answers were right or wrong. However, personally I felt like my participation grade was too low and am not sure what the expectations were on participation more than posting in every form on time. I often wondered if we got higher participation grades for posting one or two sentences to other peoples posts, like I saw others doing. I read other posts but never replied to them unless that was instructed.

I honestly did not read the textbooks at all. I felt like the information was well covered in class and I learn better from lecture than I do by reading because it is hard for me to stay focused and find the time to read. I do not think that the textbooks were required because I got good grades without them. I would have read the textbooks if I had more time or if the reading was a lot less but with other classes, work and family; reading did not fall very high on my priorities.

I understand why there were due dates for each module and tickets to class and such. However, it was very hard (again with work, other classes and family) to be able to put that much time into class almost everyday for the first week. I believe I had to turn on of my tickets to class in late just because it was not feasible to do everything that day. If the days could somehow be more spread out so there is more flexibility on when students can complete these, that would be most helpful for the busier students. most of my 4 or five week classes would have a list of assignments to have completed by the end of the week, which what I was expecting. It would be helpful if the Modules for the week were all posted at the same time so then students could get a little ahead when they know they have a full week of work or something.

Overall, I really enjoyed this class and personally think this is much better than most classes that I have taken, especially online! You are very helpful for questions and discussions as well as nice and understanding when it came to issues with our grading and such. I would recommend this class and the issues that I had with it were more of a preference then they were of an issue in light of many other classes that I have taken. Most importantly, I learned something and was not bored of being bored!

- I have never had a professor like Dr. Hofferberth during my time at UTSA. He really cares about each one of his students, if they are willing to reach out to him about their concerns. He also responds and grades assignments at an incredible speed, which I really appreciate. But I must say that the course was very fast paced and required too many activities to be completed, not very considerate of busy working students, who might be taking other summer classes too.

- I really enjoyed Professor Hofferberth's course. He encouraged students to dive deeper into the information and engage with the other students in an online discussion. He was readily available during the course and always had efficient videos and information. The only critique that I would have involves the exams. Many of the questions were a bit confusing and had answers that were extremely similar. Other than that, I really feel like I learned a lot in this course and look forward to taking another class from Professor Hofferberth.

- I really enjoyed this course with Dr. Hofferberth, he is clearly intelligent in his field and offered as much as he can in such a short time frame.

- I really like this course however it is moving too quickly.

- I said in the introductory survey that I hoped for a fair and balanced presentation of the issues - some professors can be overly political or dogmatic. I was entirely satisfied. The professor was completely professional and presented the material in a greatly balanced manner. He was also enthusiastic about the subject which always promotes active learning. Prof. Hofferberth was also very responsive to questions and concerns, and in an extremely timely fashion. This was a great class - I really wish I had taken it as a full semester because it's such a large and complex topic and I bet I could've learned a lot more from Prof. Hofferberth!

- It was undeniably apparent that Dr. Hofferberth not only cared about thoroughly educating the students, but also made a remarkable effort to be available to discuss the course content and provide feedback inside and outside of his scheduled
three-times-weekly meetings.

Also, the manner in which the content was structured was incredibly beneficial. Expectations and objectives were clearly stated, activities were thought-provoking and engaging, and the time allotted was usually reasonable.

This is my first class with Dr. Hofferberth, and I would highly recommend his classes to anyone, and hope that other UTSA professors would be open to taking some notes from his procedures.

- Professor taught the class as if it were more of a graduate program rather than undergrad which isn't completely terrible, just felt that he could've been more understanding with students. Overall needs to work on being more of a teacher rather than an academic.

- Professor was always responsive and helped tremendously. When there were setbacks, he was there to reassure me.

- Really awesome Professor! In the previous semester I had him, he wanted some feedback and critiques at the end of the semester, and I noticed during this course he took it really well! Takes the time to reply to his students, emails back extremely fast or in a reasonable time. He also gives very good feedback when I asked him what I could have done better, also is very helpful on letting us continue an exam if a problem occurs. Additionally, his course outline is very organized and easily understandable and easy to navigate for us if we had any questions that could be answered already. I don't think there are really any ambiguity or other areas of improvement I could think of, very well-rounded course and Professor.

- The instructor was one of the best instructors I have had in an online platform.

- The lecture/PowolPoints were a solid source of instruction. However, in another online class taken this summer, the instructor included links to discussion panels, TED Talks, and media articles as a means of exposing students to contemporary developments and scholarly material. To me personally, that was among the best elements of that course, and I think that could potentially be useful in this course as well.

- There was too much to be done in so little time. It was so fast paced with a lot of workload. I don't recommend taking this course as a summer course. It might have not been as bad during a normal semester. Not easy at all.

- This class was so informational and well-organized, something I haven't experienced in an online class before. I appreciate how hands on this professor was, replying to our discussion posts and allowing us to further expand upon our points. I would highly recommend this class.

- This was an excellently structured course that effectively taught its contents within a constrained one month time frame. The instructor was helpful, attentive, and friendly, and the class interacted well together.

- i will say he expects alot more from the student i took him in summer but the class is actively over whelming

- instructor was excellent, the amount of work and time crunches for an accelerted summer class was a lot but was doable after a more reasonable testing time frame was given.
