

# 2017 Noblis Summer Internship Program

## Learn, Network, and Contribute

A summer at Noblis is a summer well spent. If you are a student who is looking for good pay, valuable real-world experience, and the ability to apply your coursework, Noblis is the place for you. Our interns spend their days collaborating with other interns and full-time staff to create innovative, mission-focused solutions for many of our clients' most pressing problems.

## Build Your Real-World Experience

When you intern for Noblis, you will be doing real, professional work. This means you'll work on projects where you can learn, contribute, and see what it's like to be a working professional in your field. You will be an integral part of our team from day one. You'll also participate in group collaboration activities that allow you to meet other interns and form new connections. You'll get to attend regular lunch-time presentations and development sessions. You'll always be learning.

## Invest in Your Future

Your summer at Noblis will be challenging, educational, hands on, and memorable. You will leave us prepared for life after school—as a leader, problem-solver, and critical thinker with real-world experience. And if you love it at Noblis, you may not have to leave us. A significant percentage of our interns end up as full-time employees.

## Program Information

- The official program runs from June 5 to August 11, 2017.
- Most jobs are located at Noblis' headquarters in Reston, VA (close to Washington, DC).
- We also have a few openings in Washington, DC; San Antonio, TX; Bridgeport, WV; and Danville, VA (our Center for Applied High Performance Computing)
- You'll get paid. We offer an attractive hourly wage for full-time work (Monday through Friday, 40 hours a week for 10 weeks).
- The work will be challenging and exciting. You'll be guided by our expert staff, make new professional connections, and build your network. You'll attend weekly seminars and networking events designed to prepare you for life after school.
- You will contribute to the good of the nation by working in national security and intelligence, enterprise engineering, environmental sustainability, transportation, healthcare, corporate business operations, or on the Noblis Sponsored Research (NSR) program.
- We accept applications from Undergraduate, Master's, and PhD candidates.

**We are accepting applications for Summer 2017.**
