Dear Ephrem Fernandez, (as private and confidential)

UTSA Course Evaluation Survey Results

Dear Ephrem Fernandez,

In the attachment you will find the evaluation results of the survey 23717 PSY 3543 001 Intro to Clinical Psychology.

The overall indicator is listed first. It consists of the following scales:

The overall indicator is followed by the individual average values of the scales mentioned above. In the second part of the analysis the average values of all individual questions are listed.

If you have questions about the evaluation system please contact Lisa Johnston or Doug Atkinson at evaluate@utsa.edu

Your written comments are an important part of your course and instructor evaluation. Please provide feedback in the box below on aspects of the course and/or the instructor that were most effective or need improvement. Student comments will be provided to your instructor only after course grades have been submitted. The instructor may, but is not obligated to, share these comments with others or include them in any evaluation process.

- Dr. Fernandez is a great professor! I loved this course! I know this information will be used for when I go to graduate school.

- Dr. Fernandez has great passion and knowledge for his field and takes an interest in his students. This makes the class enjoyable. He does a great job in getting the class to understand concepts in a basic way even if the concept is challenging. What I most enjoyed about the class was the structure. The way assignments and testing are set up, I felt like I've been actually learning and interacting versus just competing for a grade.

- Dr. Fernandez is a very engaging professor he expects everyone in his class to participate, which I think is great personally. Throughout lectures he will often give examples of actual therapy sessions as opposed to having us just read about them. I personally like his approach of offering a lot of his own examples as a practitioner as well as therapy sessions from famous theorist and clinicians throughout the history of therapeutic psychology. I honestly feel as though this class is helping me get a better understanding of what to expect if I wish to pursue a career in the field of clinical psychology and I think that the way Dr. Fernandez teaches it should be the standard.

- Dr. Fernandez is an amazing professor and an asset to UTSA.

- Dr. Fernandez is an inspiring professor, and I would love to get the chance to continue my education with him. I believe that any student would be able to learn quite a bit from him.

- Dr. Fernandez is well spoken and relays information appropriately. It would be nice if there was another exam sometime during the earlier part of the semester or maybe a few pop quizzes to ensure that students are on track and understanding the material versus one exam at the end of the semester. Some students utilize these types of learning checks as an indication of whether or not they should drop the course or continue on. Otherwise, I loved the course and valued everything Dr. Fernandez taught us.

- Dr. Fernandez made learning fun and interactive. When he lectured, which is often, he made sure to ask questions and get students involved. The learning also included hands on projects that made it easy to understand what we were learning. Thank you!!

- Excellent professor who really loves his subject and is adept at teaching.

- Get professor and class material, the essay is intimidating sing there is not much direction.

- I enjoyed Dr. Fernandez’ class a lot. He really made complicated topics easy to understand. He was extremely knowledgeable and helpful.

- I honestly registered for the class because it looked like one of the more interesting upper division electives, and I am very happy with my choice in class and teacher. I do wish that there was a midterm test tho so I could better evaluate where I stand in the course and what I know and what I need to work on.

- I like this class, however, I think you should give out quizzes maybe before going over each chapter to encourage students to read the book and participate in class. I have found it very easy to not read the book and make up an answer and/or dodge your questions.

- I really liked going to class. He really knew how to engage the students and it made learning the material a lot more interesting and easy.

- I think the course was good. The things that I would say could be improvements could be that the instructor not make the students feel like they cant ask questions if they need the help. I was a bit intimidating and also rejection of getting further help just because we are a higher level psychology class. Hope things can be a bit different so more students can succeed in the class.

- I've loved this class so far!! Great instructor, great teaching method!!

- No complaint for this course. I wish I could take this class all day. Very knowledgable professor and inspiring. I would love be to become a clinical psychologist because of him. Highly recommend.
Prof. Fernandez is a great professor. He has a calm, soothing voice that is very easy to keep up with.

The video's of the different kinds of therapies was really interesting and provided a lot of good information when trying to understand the differences in practice of the theories.

This class exceeded my expectations! The content and class discussions are so engaging and relevant for future clinicians and clinical researchers. You are able to walk the class through just about anything with ease and expertise - therapy techniques, theories, history of clinical, etc. I really enjoyed the sequence of topics. I was initially nervous about your emphasis on classroom participation, but it has really enhanced my class experience. The book is excellent, too - please don't change this if you don't have to! I appreciate that you actually expanded on chapter content and even lectured on things that aren't in the book. Going to class feels like a treat, because I know I'm going to learn something new even if I already read the book. If anything, I wish we could've seen more videos about how the therapies are conducted.

This class has made me super excited about my major again. It provided me with a bit of real world experience as well with the assignment that we had. Dr. Fernandez is an excellent professor and I am very grateful to have taken this course. He is a very thoughtful and caring professor, but also expects you to do your part, which is the perfect balance in an educator.

This has been one of the best classes that I have taken while in my undergrad career. Dr Fernandez allows his students to take an active role in their education and makes the class hands on. Great professor and class.

This was a great class. I particularly enjoyed the level of interaction Dr. Fernandez got out of us.

really enjoyed going to this class. the content is very interesting
