

Artifacts of Texas

Match the picture with the correct term to learn more about these artifacts and what they were used for:

Uniface: A piece of stone worked on one side

Biface: A piece of stone worked on both sides to produce a regular shape and edge

Lithics: Stone tools

Plainware ceramics: Age range 18th century, usually undecorated. The shape, color, design, and size can determine the age, form and function. Such as a cup, bowl, saucer, or olive jar

result in the manufacture of stone tools. A large deposit can indicate a lithic workshop

Pipes: Age range: 17th-19th century used to smoke tobacco or used for trade

Decalware Ceramics: Age range: 1900's commonly found in fragments with elaborate designs

Buttons: A common historical artifact that was made from shell, bone, metal, or glass

Toys: 19th century ceramic toys could be in the form of porcelain dolls, marbles, or metal jacks.
